

PLACEMENT CELL

ABOUT THE PLACEMENT CELL

The Placement department at BLDEACET offers outstanding job opportunities to our students. We aim to secure placements for our students and inspire and support them in becoming first-generation entrepreneurs. We firmly believe in our vision and are committed to nurturing our students into self-driven industrialists of tomorrow.

The department actively works on preparing students for aptitude tests, enhancing their personality development, and facilitating meaningful industry-institute interactions. We understand that a well-rounded skill set is essential for success in the professional world, and we strive to provide comprehensive support to our students in their career development.

Our students are driven by a mission to make a positive impact on society through technological innovation. This dedication to creating value aligns with the values sought by recruiters, who consistently recognize the quality and potential of our students at BLDEACET.

We are proud of our track record in securing placements for our graduates, and we continuously strive to maintain the highest standards in preparing them for successful careers in their chosen fields.

Placement Training

The placement cell actively carries out an essential activity of providing placement training to bridge the gap between industry and academia. The training module developed by the placement cell consists of three phases.

- In Phase 1, which takes place in the second year, students receive training in life skills, communication skills, and other essential areas.

- In Phase 2, conducted in the third year, focuses on aptitude training, reading skills, and other relevant aspects.
- In Phase 3, held in the fourth year, students receive technical training, guidance for group discussions, personal interview skills, and more.

In addition to the training module, students are exposed to the IT industry through the Infosys Campus Connect program. Industry experts deliver talks on their expertise and motivate the students.

Placement training plays a vital role in shaping the career goals of students. Every engineering student aspires to secure a job in a top organization that visits their campus for recruitment. Recognizing the importance of training in enhancing employability skills and securing good placements, the institution emphasizes the significance of comprehensive training for engineering students.

In today's competitive employment landscape, securing placements has become increasingly challenging. Thus, training students and equipping them with life skills is an important responsibility of the institution. In addition to technical expertise, developing a well-rounded personality is crucial. To fulfil these requirements, our college operates a dedicated training cell that focuses on enhancing the capabilities of engineering graduates to meet industry standards.

The objectives of the Training Program are as follows:

- Ensuring 100% employment for all students.
- Identifying the core competencies of students.
- Providing training to meet industry expectations through Career Development Programs.
- Building confidence and fostering the right attitude among students.
- Enhancing communication skills.

The Placement Cell carries out various activities, including creating awareness about career planning and mapping, equipping students with life skills, providing personality development training, and organizing training programs in quantitative aptitude, logical reasoning, and verbal reasoning through external training organizations and in-house trainers. The cell also conducts mock interviews to prepare students for professional interviews and trains them in group discussion techniques. Furthermore, online tests and written aptitude tests are conducted to assess students' abilities.

Other Facilities

Essential Facilities: Enhancing Convenience at BLDEACET

ATM Convenience: To ensure easy access to banking services for our students and staff, the State Bank of India has installed Automated Teller Machines (ATMs) on campus. This convenient facility allows individuals to carry out various financial transactions at their convenience.

Green Campus Oasis: At BLDEACET, we take pride in our impressive and pollution-free campus. With panoramic green surroundings, elegant landscaping, and beautiful flowerbeds, our campus creates a serene and tranquil environment for learning and personal growth. We believe in fostering a sustainable and eco-friendly atmosphere that inspires and rejuvenates.

Uninterrupted Water and Electricity Supply: We prioritize the well-being and comfort of our students, which is why we have complete arrangements to deliver uninterrupted water and electricity supply throughout the campus. Sufficient water coolers with filtered water are strategically placed, ensuring clean drinking water is easily accessible. In the event of power failures, high-power generators are available to provide a seamless learning environment. Our constant monitoring ensures cleanliness and hygiene are maintained to the highest standards.

Health and Well-being Initiatives: At BLDEACET, we understand the importance of a healthy lifestyle in supporting academic success. To promote student well-being, we regularly organize health camps on campus, allowing students and staff members to undergo health examinations. These initiatives aim to enhance health-related knowledge, attitudes, skills, and practices, empowering individuals to lead healthy lives.

Medical Facilities: The well-being of our students is of utmost importance, and we ensure that necessary medical facilities are readily available. Each hostel is equipped with first aid facilities to cater to immediate medical needs. During working hours, students can receive free first aid assistance as required. Additionally, qualified physicians are located in close proximity to the college and hostels, offering consultancy services when needed.
